

BERKSHIRE CORPORATE

LUNDY LANE

Case Study

PROJECT OVERVIEW

The property had prior approval for creating a self contained unit as part of the mixed use scheme that was completed (see completed projects).

Berkshire Corporate looked to enhance the size of the unit by applying to extend the building to the rear. This resulted in creating a lovely open plan area towards the rear of a large one bedroom apartment complete with private outdoor space.

The apartments are finished to a high standard offering well designed, appealing specification for the occupants including;

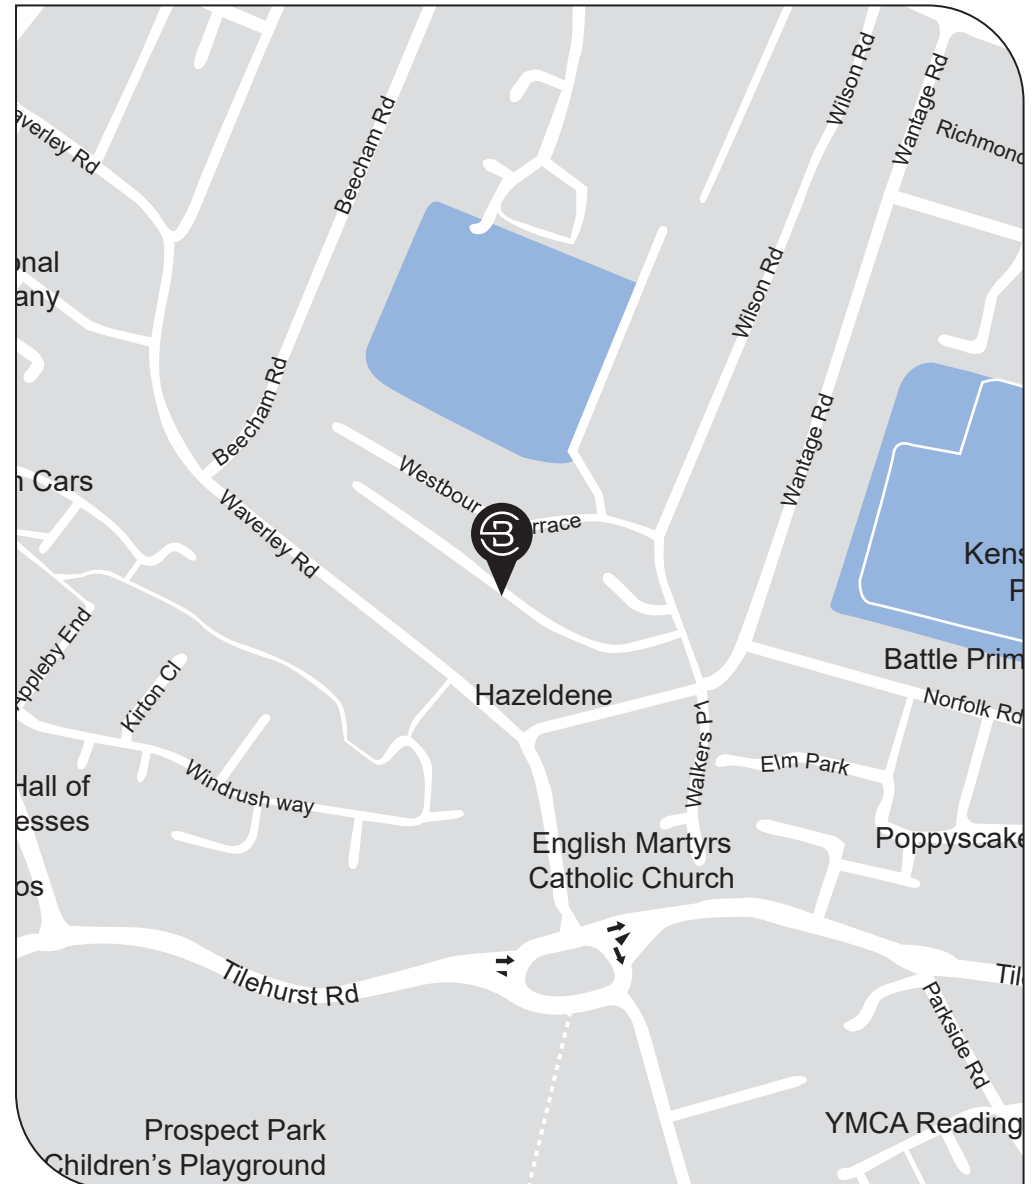

- Fully fitted kitchens with quartz surfaces
- Integrated appliances
- Polished Chrome finished designer sanitary ware
- LED Strip lighting throughout
- Herringbone Flooring
- Ring Video System
- Allocated parking

Berkshire Corporate retained the asset which is currently let to a private tenant

Project Type ; Change of Use Scheme

Timescale : 5 months
